How to use Garageband to Podcast

- Plan:
 - Intro
 - Podcast intro: who, what it's about
 - Episode intro
 - Content: informative segments
 - Outro

Recording your first episode

- Open Garageband and choose New Podcast Episode
- Type a name, choose a save location
- Select a vocal track to record yourself speaking
- Record, review and playback

Polish your sound

- Apply effects to your voice
- Delete pauses, noises
- Use jingles, stingers and foley
- Smooth out transitions

Enhance your podcast with Artwork and Chapters

- Select podcast track
- Drag playhead to place you want to mark
- Click add marker, drag photo from media browser, to add web link type url in url field

Export your Podcast

- Go to the Share menu, choose Export to disk
- Type a name, choose a location to save it
- In iWeb add your episode to your podcast series
